NGUYEN THI NGOC UYEN

Mobile Developer (React Native /Flutter)

Dob: 16/11/2000
Phone: 0399 088 051
Email: nguyenuyen352021@gmail.com
Portfolio: https://ngocuyen297.github.io/porfolio_nguyenthingocuyen/
Address: Bui Van Ba Street, District 7, Ho Chi Minh City

EDUCATION

2019 - 2023

HO CHI MINH CITY OPEN UNIVERSITY
Information technology
Received scholarships in most semesters and achieved a GPA of 3.1/4.0.

CERTIFICATIONS

5/2024 Toeic: 690

SKILLS

Mobile Development:	React Native, Flutter, Swift (iOS), and Kotlin/Java (Android).
Front-end Skills:	HTML5, CSS3, JavaScript (ES6+), ReactJS, Nextjs.
Back-end Skills:	C#, .NET Framework, .NET core, Golang.
Database:	SQL server, MySQL.
Tools:	Git, GitHub/GitLab , SVN,Postman, Docker, Visual Studio Code, Xcode, and Android Studio.

WORK EXPERIENCE

07/2024 - 04/2026

Công ty TNHH Giải pháp phần mềm Việt Á
Full-stack Developer

- **Built and maintained** cross-platform mobile applications using **React Native** for both **iOS** and **Android** platforms.
- **Published, released, and maintained** production-grade mobile applications on the **App Store** and **Google Play**, managing **release cycles**, **app versioning**, and optimizing **performance**, **stability**, and **user experience**.
- **Developed and maintained** modern web applications using **React.js** and **Next.js**.
- **Developed and integrated custom Native Modules** using Swift (iOS) and Kotlin (Android) to bridge platform-specific functionalities with React Native.
- **Built responsive user interfaces and animations** based on **Figma** design specifications, ensuring pixel-perfect implementation and smooth user interactions.
- **Designed and implemented database schemas** based on business requirements, ensuring **data integrity**, **scalability**, and maintainability.
- **Developed backend APIs** using **.NET Framework**, supporting seamless integration between frontend and backend systems.
- **Performed end-to-end troubleshooting, testing, debugging, and performance optimization** across **mobile**, **frontend**, and **backend** components to improve **reliability**, **security**, and **scalability**.
- **Collaborated with clients, stakeholders, and cross-functional teams** to gather requirements, define project scope, and drive implementation planning.
- **Maintained, modernized, and optimized legacy web applications** through **bug fixing**, **framework upgrades**, **dependency management**, and **code refactoring**, improving **performance**, **maintainability**, and long-term **scalability**.

07/2023 - 01/2024 **WEALLNET CREATIVE AGENCY**

Flutter Developer

- Participated in the development of the **Wealnet** mobile application using **Flutter**.
- Designed and maintained **SQL Server** databases, and developed backend services and APIs using **.NET Framework** and **Golang**.
- Collaborated with clients and team members to gather requirements, discuss solutions, and contribute ideas for product improvements.
- Implemented **real-time features** including push notifications with **Firebase** and in-app chat functionality.
- Planned and managed application releases, including publishing and maintaining apps on **Google Play** and the **Apple App Store**.
- Contributed to technical discussions and problem-solving, proposing effective solutions throughout the development lifecycle.
- Investigated, debugged, and resolved issues while continuously improving application performance and stability.
- Took ownership of features throughout the entire development lifecycle, from design and implementation to testing and deployment.
- Researched and applied new technologies such as **Redis** and **MobX** to enhance system architecture and development efficiency.

09/2022 - 2/2023 **BOOLFLY VIET NAM COMPANY**

Web Developer

- Developed and maintained e-commerce websites using **PHP** and the **Magento** framework.
- Designed and implemented responsive website interfaces using **HTML**, **CSS**, **JavaScript**, and **Magento** themes.
- Imported and processed over **500,000 customer and sales records** into database systems, ensuring data accuracy and integrity.
- Collaborated with team members to analyze requirements, plan project implementation, and deliver business solutions.
- Contributed to **Magento theme development**, strengthening both frontend and backend development expertise.

PROJECTS

08/2025 - 03/2026 **Loyalty Booking App - Hotel Booking & Customer Loyalty Platform**

Fullstack

- Developed and maintained the mobile application using **React Native**, delivering hotel booking, loyalty points tracking, rewards redemption, promotions, news, and booking management features.
- Implemented advanced mobile capabilities including **GPS/Location Services**, **QR code scanning**, **secure token storage**, **Social Login (Google & Facebook)**, **WebSockets**, and **offline data synchronization**.
- Integrated **OneSignal Push Notifications** and developed automated promotion and point-expiration notification services using **.NET Framework (Windows Services)**.
- Integrated and maintained **VNPAY payment gateway**, implementing secure payment flows, transaction validation, and payment status synchronization across mobile and backend systems.
- Contributed to the development of **backend APIs** using **.NET Framework** and participated in **SQL Server database design** and business requirement analysis.
- Developed and maintained customer management and administration web portals using **React.js**.
- Optimized application performance, scalability, and user experience across both mobile and web platforms.

02/2025 - 05/2025 **Co.op Food App – Retail Employee Attendance & Workforce Management Platform**

Mobile

- Developed mobile application interfaces and features based on **Figma** designs, ensuring responsive layouts and seamless user experiences.
- Implemented a **GPS-based attendance system** for retail employees, enabling accurate check-in/check-out verification through **Geolocation Services**.

- Developed **real-time attendance workflows** with location validation using **GPS** and **Geofencing** technologies.
- Integrated **OneSignal Push Notifications** to deliver automated check-in/check-out reminders and attendance-related alerts.
- Built location-aware authentication features using **GPS & Geofencing**, ensuring users could only check in at authorized store locations.
- Implemented **real-time photo capture and verification** during check-in using **React Native Vision Camera**, improving attendance accuracy and preventing fraudulent check-ins.

07/2023 - 01/2024

WEALLNET App – All-in-One Social Media & Entertainment Platform
Mobile Developer

- Maintained and enhanced key features of the **WEALLNET** social networking platform using **Flutter**.
- Developed and maintained **real-time messaging** and **notification systems**, integrating **Firebase Cloud Messaging (FCM)** for push notifications.
- Analyzed, debugged, and optimized legacy codebases, improving application stability, reliability, and maintainability.
- Resolved production issues and enhanced core platform functionalities to ensure a seamless user experience.
- Optimized application performance, reducing loading times and improving responsiveness across the platform.
- Collaborated with cross-functional teams to troubleshoot system issues and deliver continuous product improvements.
